

## High School Graduation Requirements Presentation

The State of Michigan has now set the number of credits in each subject area, and, in many cases, specified the specific courses that must be taken in English, mathematics, science, social studies, health/physical education, the arts (visual, performing, or applied), and world languages. An online learning experience is also required. This presentation will introduce you to these new Michigan High School Graduation Standards also known as the Michigan Merit Curriculum. Click the link below to download the presentation.
