

Process for a COVID-19 Case at School

What happens when someone at school gets COVID-19?

Student/Staff is confirmed positive for COVID-19 with diagnostic test (nose/throat swab)

*If someone is placed in quarantine, they may decide to get a COVID-19 test, but a negative result will NOT shorten the length of the quarantine period.

**The health department can issue an official letter or other documentation releasing people from isolation or quarantine. Schools may use the this letter to determine when to allow return to school.
